FIG. 4 illustrates a different application employing the present invention. FIG. 4 illustrates a traditional PBX 67, but it also employs elements of the type of distributed architecture illustrated in FIG. 3. FIG. 4 is thus a hybrid of old technology, or traditional PBX technology, integrated with a concept of computer telephony. That is, FIG. 4 illustrates an employment of the present EMP 64 in conjunction with the prior art system illustrated in FIG. 1. It employs an interface 66 which comprises the PBX 67, the application server 68, and the emergency message processor (EMP) 69. FIG. 4 illustrates telephone sets 70, 70', 70'', 70''' and personal computers 72, 74 which connect with the interface 71 in a manner as discussed with respect to FIG. 3.
